I designed a case for Freenove Raspberry Pi Pico breakout board. I wanted to protect the bottom part of the board from any unwanted contact.

There is a version with snap fit clips to secure the board from falling off the case, and the other one without clips for easy.

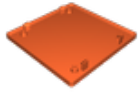

Print Settings

- Layer height: 0.2 mm.
- 2 walls
- 2 bottom/top layers
- **inner/outer wall printing order (for clips overhangs)**
