Summary

Found some rocks/dirt clumps in my yard and scanned them

[Learning](#) > [Other 3D Objects for Learning](#)

Tags: [terrain](#) [stone](#) [rock](#) [outdoor](#) [3dscan](#) [terrarium](#)

Tried to get the best scans that I could so the items can be up/down sized and cut down and used for other things like bases for DND, figures, fossils, etc.

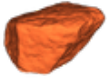

Model files

rock1.stl

rock2.stl

dirt1.stl

rock3.stl

rock4.stl

flat-rock.stl

|| Small rock that I could get to close at the bottom of scan

rock5.stl
