Backstory:

Got annoyed with our bag dispenser for the one time use bags like you get at the grocery store and was looking for a more organized way to handle them.

Details:

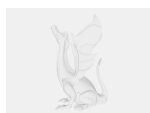

If you fold your plastic bags into triangles like this: <https://www.wikihow.com/Fold-a-Plastic-Bag>

This holder it set to put them in the top and dispense them from the bottom. It may take you a try or two to figure out the right size, but much better than stuffing them in something and then trying to get just one out!

I have printed this, but I designed it and made it for a friend and gave away the print without taking a picture, so I wasn't able to post a picture. You do need supports on the horizontal overhang.

Someday I will revisit this and make a taller version as well as a double sided one, if you are interested let me know and I can make some modifications. As is it only holds 4-5 bags depending on thickness.
