Summary

An insert for vita game cases to hold 6 more game carts in the extra space around the main cart holder.

[Gadgets](#) > [Video Games](#)

An insert for vita game cases to hold 6 more game carts in the extra space around the main cart holder.

I got some used games that came without a case and I wanted somewhere to put them where I wouldn't lose them.

This design was vaguely inspired by Jiraiken's Switch game case insert:
<https://www.thingiverse.com/thing:3276374>

Print in PETG (or something else with a similar amount of flex) at 0.15 mm layer height or less. I haven't tested this, but I expect that PLA would be too brittle for the clips. It would still mostly work, but you'd probably lose the clips pretty quick.

I've only tested with US vita cases. I think the cases might be slightly differently sized in Japan, and maybe elsewhere? I'm happy to help tweak dimensions if anyone wants to try it out and tell me what needs changing, otherwise the scad file is vaguely parametric.

I love seeing my designs in use. I really enjoy it when people post makes. <3
