### Summary

It is an Ikea Skadis holder for my filament swatch box

[3D Printers](#) > [Accessories](#)

Tags: [organizer](#) [ikea](#) [mount](#) [swatch](#) [skadis](#) [bambulab](#)

After designing my [spinning filament swatch box](#), I realized it was inconvenient on the table and prone to falling, scattering the swatches. To solve this, I created and printed an IKEA Skadis holder for the box.

This version requires 2 M3 inserts and 2 M3\*4 screws. If you don't have a soldering iron, you can use my plug-in version instead.

If you want the easy version without insert nuts then you can download it [here](#)
