I would like to create a new line of small flexi animals that are easy to print (print-in-place) and without supports. The number 12 is this cute Sloth, how does it look? 😊 Print-in-place, No Support Required. Keychain-friendly & Magnet Version for the Magnet version, please use D8x2 mm Round Magnet

To make the keychain hole I recommend adding a cylinder (negative modifier) in your slicer software, 3 or 4 mm in diameter.

How to assemble the “Magnet” version

Assembly is very simple: push the magnets in, they will fit together. If you want, add a little glue (I didn't need it).

Coloring tips if you don't have AMS (yet)

I tried these acrylic brush markers bought on Aliexpress / Temu and I am very satisfied with them. My only warning: before trying them on an “important” printed model, always do a test run to make sure the marker does not smudge.

Commercial License ✂

Do you want to sell prints of this model? You can purchase commercial licensing for this model [by joining the Commercial License in my Patreon](#).
