Tags: [sd](#) [sdcard](#) [sdcardholder](#) [sdcardorganizer](#)

This is a simple SD card holder with 8 slots for SD cards. You can print it on any 3D printer, whether FDM or resin. No supports are needed for this print.

In the files, you will find 3 different models:

1. A one-piece model with an aesthetic groove running on the bottom side.
2. A simple one-piece version with no grooves.
3. A two-piece model that you can print in two different colors. It is press-fit, but the final result may vary depending on the machine, filament, or settings used.
