Because I have a printer with one extruder, I decided to design a two-color pencil cup with a cloud ornament, consisting of three parts, for printing with one extruder.

I made it in two sizes, the smaller one can be used to store all sorts of things. It has five types of lids divided into different numbers of compartments, as well as one non-divided and one solid lid.

All parts can be printed without any supports.

Also, take a look at another cup with a fire design:
