Magnet Fire Alarm Adapter Holder

Because I did not want to drill a hole into 2 metal racks to attach a fire alarm in each one, I made this little magnet fire alarm adapter holder plate.

Parts needed:

- 1x **Fire alarm used with 74mm screw holes**
- 1x **Magnet with an M4 countersunk screw hole and Ø31mm and 4.5mm thickness**
- 1x M4x12 countersunk screw and nut
- 2x M3x12 screw and nut

Printing instructions:

- 0.2 speed profile
- No brim
- No supports

- Textured sheet used

Happy printing =)
