Summary

A simple toothpaste squeezer I made in TinkerCAD

[Household](#) > [Bathroom](#)

Tags: [toothpaste](#) [squeezer](#) [toothpastesqueezer](#)

This is a simple 3D design for a toothpaste squeezer. There are no supports needed. It might be a little hard to get the tube in but it should go in, but if the hole isn't long enough see this design for a longer one :

<https://www.thingiverse.com/thing:6653041>

The hole is 4.5 cm long already though.

If you liked this, consider liking, commenting and sharing a make! :)
