For everyone waiting for the next design marvel, I have to disappoint you. This is purely functional.

Hi there,

Because I'm a fan of small paint buckets, I decided to tinker in Tinkercad and create a drill attachment just for them.

This little gadget fits the standard 1/4 inch (6.35 mm) hex bit holder, perfect for all your tiny paint adventures.

And yes, it comes in three sizes: 6 cm, 10 cm, and 16 cm!

Have fun
