Summary

10 bobber stoppers, snip ends and try to avoid leaving sharp corners which can snag lines. Modeled after Gizmos.

[Sports & Outdoor](#) > [Outdoor Sports](#)

Tags: [fishing](#) [bobber](#)

10 bobber-stoppers as a single sheet, snip connecting bits as smooth as possible, file/snip any sharp edges to avoid lines snagging.

To use, weave line in-and-out of holes, recommended to use bead between stopper and bobber.

Print is quick but requires a good first layer, so make sure you watch the start or youll just end up cleaning spaghetti off your nozzle.
