[goggles3](#)

This is a DJI goggles 3 holder for the **honeycomb storage wall**. Just line up the lenses with the lens covers and the adjustment knobs should be held by the dedicated holders. Also the goggle is upside down so no dust will get on the lenses

#### My print settings:

- \* 0.4 mm nozzle
- \* 0.2 mm layer height
- \* 4 walls
- \* 25% infill
- \* supports are needed. I would suggest 40° angle and automatic tree. As shown in the picture below.

**Happy printing!**
