Summary

An organizer for The Red Cathedral that accommodates sleeved cards and upgraded components

I designed this organizer to accommodate sleeved cards and the GeekUpBits upgraded tokens from BoardGameGeek. It should work with the standard cardboard tokens as well. It has zero lid lift and allows for vertical storage.

Note about card sleeves: I used Paladin Sleeves Arthur, these are middle-of-the-road as far as thickness. Thicker brands like gamegenic might have to be squished a bit more as you close the lid.

The tray for resources has 2 version, one with a slide-in-place lid, and one lidless. It will work fine without the lid, but I included it just in case the box lid comes off slightly during travel to prevent the coins from moving about.

To pack it away place the main board, player boards and rules into the box first, with the inserts on top.

Settings:

Printer: BambuLabs X1C

Filament: IIIDMax PLA+ Black

Infill: 8% crosshatch

Nozzle: 0.4mm

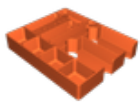

Layer height .2mm

Wall loops: 2

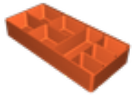

Top Layers: 3

Bottom Layers: 3
