This insert is for Catan PLUS (2016) that includes the 5-6 player expansion, two new maps (in this case are Mallorca and New York, but it depends on the country I think), two mini-expansions “Frenemies” and “Helpers of Catan”.

It also fits the Seafarers expansion (2015) with its 5-6 player expansion and the Cities&Knights (2010) with its 5-6 player expansion.

I have 2 sets of card trays, for easy access to all players, but you can only print one if you wish. This is the original model used <https://www.printables.com/model/362095-catan-card-holder-v1>

Each color has all its components in trays that fit together, but are separated according to the expansion they belong.

Each mini-expansion has its own box storage with all its components .

There are dedicated storage for all mini figures, dice and numbers.

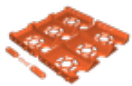

Box has no lid lift, and it could store some other expansion if carefully organized in the box.
