Summary

We created a portable rack to help the Chemex dry.

We use a Chemex six-cup or ten-cup maker every day. To help it dry, we created a portable rack. It turns out that it can help dry a whole lot more.

Water bottles, Fellows Carter coffee bottles, Stanley bottles, etc...

The drying stand is made of two pieces and can be disassembled for transportation. We took it camping with us this weekend.

After our camping trip, we added iPhone and iPad stands to the list of uses.

It also works with the Aeropress original.
