Summary

Switch Housing for 21mm x 15mm rocker with back cover

[3D Printers](#) > [Prusa Parts & Upgrades](#)

Open back switch housing for a **21mm x 15mm rocker switch**.
Uses (2) #6 wood screws to mount. I used 1/2" screws to mount this in my lack enclosure.

Loop your wire in the back and secure with a blob of hot glue from a hot glue gun for strain relief.

Print face down, no supports.

The cover fit in the back of the housing, But I suggest to glue it in place
