Summary

Christmas time is covered with beautiful, marvelous Klima, full of expectations. Like this village.

[Seasonal designs](#) > [Winter & Christmas & New Year's](#)

Tags: [santa](#) [deer](#) [snow](#) [winter](#) [house](#) [village](#)
[christmass](#)

All houses are printed with white color and at Christmas time everybody puts lights on the house, so I printed roof edges separately with GLOW in the dark material and then glue them to the roofs with double sided tape to look like houses have Christmas LED lights.

The snowman is printed without support and noses is printed very smooth. (Without support)The tree is printed with green Glow in the Dark. (Print it with 5% infill)

Santa and deers are printed brown and I colored white the stick which is holding it to the roof of the big house (to not be seen on the scene) and colored red the hat of Santa

For the lights I used 12V power adapter and 12V lights and connected them together to get night ambient. On the bottom houses have holes to put in the lights. (You can use any lights like for the Christmas tree)

Printing without support, Z=0.3 PLA (white, brown, green and blue Glow in the dark) Merry Christmas

W
