Light Fury: <https://www.printables.com/model/975623-flexi-baby-light-fury>

Flexi Toothless inspired by How to Train Your Dragon!

Both the keychain and regular versions are preloaded into the 3mf project file, just hide the one you don't want. For people using Prusa/Cura or other slicers that can't open the 3mf, please use the parts instead. Just drag them all (choose one of the tail parts, depending on whether you want it to be a keychain or not) into your slicer of choice and choose the option to "Load as a single object".

All my models are designed to use 7mm jump rings or larger.

Note: This model is for **personal** use only. If you would like to sell physical prints of this model, please subscribe on [Patreon](#)!
