updated 1. 2. 2025 | published 1. 2. 2025

Summary

Remix of flioink's mask #1. Teeth and mask are now split to enable multicolor printing without AMS or the use of paint.

Remix of flioink's amazing samurai-inspired mask #1. Teeth and mask are now separate parts to enable multicolor printing:

- **Option 1:** Print separate parts, then use some CA glue to put all pieces together.
- **Option 2:** Print the "Assembly - Multicolor" using a multicolor printer.
- **Option 3:** There's also the "Assembly - Monocolor" as a single, solid piece.

Printing:

- I highly recommend using the **Tree Supports** for both face and teeth.
- The face can be laid down on the plate, resting on its jaw and chin.

- For the teeth, try to print it so that the contact point with the supports remains hidden in the final assembly and the layer lines remain perpendicular to the teeth.

*You can test your printer capabilities with my **QuBenchy - 3D Printing Torture Test Cube**:

For those wondering about the pictures, I'm using some braided cotton cord with a 5 mm diameter.

This is mask #1 of a series of three masks. You can check them out here:

- **Oni Mask #1**
- **Oni Mask #2**
- **Oni Mask #3**

Feedback is welcome. Cheers!

Rendered in Blender, using Blender Boom's Desk Scene and @Az3Dip's Ender 3.
