Tags: wall mount battery carrier makita stable tote untippable

A battery carrier/tote for Makita 18v batteries. It's stable and won't tip over even when fully loaded on one side.
I've included two versions. A low profile one, with almost no space under the batteries, and a high profile version with an additional 5mm of height so you can get your fingers under the batteries for easy removal.
It also includes a quick connect wall mount. Uses a pair of 8g stitching screws like these - https://www.bunnings.com.au/zenith-8g-x-25mm-galvanised-button-head-stitching-timber-screws-100-pack_p2420712
No supports required.
Handle text is included if you want to make it multi-material.

Update: 31/08/24 - Switched the handle fillet for a chamfer to simplify support and bridging. Removed some challenging bridging on the battery latches.
