[stable](#) [tote](#) [untippable](#)

A battery carrier/tote for Milwaukee 18v batteries. It's stable and won't tip over even when fully loaded on one side.

It also includes a quick connect wall mount. Uses a pair of 8g stitching screws like these - https://www.bunnings.com.au/zenith-8g-x-25mm-galvanised-button-head-stitching-timber-screws-100-pack_p2420712

No supports required. Supports are built into the model. Just pop them out with some pliers when the print is done.

The wall mount works the same as for the Makita version (see video).

Update: Added a version without built-in supports.

Update: 15/09/24: Added a version for Milwaukee's wider HO batteries

Update: 17/11/24 added a bit more clearance.

Update: 25/11/24 Fixed mirrored wall mount holder.
